

ORTHOMAG

Medical Device

Orthomag is the first professional device for low frequency magnetotherapy (CEMP) to be used anywhere:

- With battery (in movement).
- By car with car charger.
- At home or office with the power supply adapter

The Orthomag applicator is one of a kind. Extremely light, comfortable to put on and take off and FLEXIBLE, it adapts perfectly to the physiology of your body. No low-frequency magnetotherapy applicator on the market has such a reduced thickness and weight. It folds to fit the shape of your body.

It definitely solves the problems of weight, size and flexibility. Orthomag has two programs (50-75Hz) for the treatment of pathologies related to bone tissue and problems related to inflammatory conditions.
