

Sports Device

Novaspin is a capacitive-resistive diathermy model, dedicated to sport.

Thanks to its 400 frequencies (300-700 kHz) and to its modulation system (1-100Hz), it is possible to perfectly adapt any treatment according to the athletes' needs, obtaining excellent results both for acute and chronic problems, muscle, tendon and joint ones.

KIT CONTENT

- Resistive probe
- Capacitive probe
- Capacitive electrodes 60 mm and 35 mm Ø
- Resistive electrodes 60 mm and 35 mm Ø
- Bipolar probe with electrode 50 mm Ø
- Return plate
- High conductive cream

TECHNICAL FEATURES

- Colour display
- 18 SPORT programs
- CUSTOM programs
- Power 200 W, frequency 300-700 kHz, modulation up to 100 Hz.

SK403-02

PROGRAMMI

01 Muscle relaxing

02 Prepare for competition

03 Post-workout recovery

04 Recovery massage

05 Knee cool-down

06 Hip cool-down

07 Ankle cool-down

08 Achilles tendon cool-down

09 Patellar tendon cool-down

10 Quadriceps tendon cool-down

11 Cervical relaxation

12 Dorsal relaxation

13 Low back relaxation

14 Quadriceps relaxation

15 Hamstrings relaxation

16 Gastrocnemius relaxation

17 Plantar relaxation

18 Oxygenation-tissue recovery
